

# Anatomy of Biting Your Horse

## An Interactive Seminar

Saturday, Feb. 7<sup>th</sup> - 5:00pm

You are invited to learn about the anatomy of the horse's mouth and what bits can and cannot do to control the horse featuring the latest research by Dr. Hilary Clayton and Dr. Joyce Harmon. Increase your knowledge and gain a new perspective on bits so that you can increase your horse's comfort in the bridle. This is an interactive seminar, attendees will be actively participating. Using actual skulls see how different bits interact in the horse's mouth. Armed with this information you will be more informed to choose the appropriate bit for your discipline and skill level.

**Speaker: Debby Hadden**

Debby Hadden is a Connected Riding Practitioner, A Pony Club B graduate, a Level 3 Centered Riding Clinician and she holds a Horse Masters Instructors Certificate from Potomac Horse Center. Debby is not employed by a bit manufacturer, this seminar is not to sell you a bit, but to give you the opportunity to engage and learn about the anatomy of the horse's mouth.

**\$10 per person – FCEA Members \$5 discount**

**FMI: Equine Exchange 610-469-0111**

Light refreshments will be available.
