

# AARON ENGLAND RETURNS TO PA FOR NATURAL HORSEMANSHIP CLINICS

Clinic #1  
April 25 - 26

Clinic #2  
May 2 - 3

***Curious about "horse whispering" and/or natural horsemanship concepts?  
Problems with your horse? Want better performance from your horse?***

Aaron England is an accomplished equestrian who employs natural techniques in training people and horses. Aaron's lifelong mission is to teach and share his knowledge with others to improve the horse industry. His knowledge of horse communication, training, and showing will get you excited about spending quality time with your horse

Many horse owners run into difficult areas with their horses, no matter the breed of horse. Aaron's extensive and professional horse training background provides him with unique knowledge that can assist owners with such common problems as horses that buck, spook, crowd the handler, trailer issues, refusing to move forward or moving explosively forward, to name a few.

Horses transitioning from a racing career can be even more of a handful than your average horse. While ex-racehorses can make incredible mounts for a wide variety of disciplines, they are often not given the same level of training before embarking on their new career.

The training progresses from intensive groundwork to saddle work, and the end result is a horse that thoroughly understands what is asked of him, and willingly performs.
