# DAVE SMITH WINTER CLINIC

DEVELOPING A PROGRESSIVE  
TRAINING PROGRAM

FEBRUARY 4 & 5, 2012  
WHYSER WYND FARM  
181 HILL ROAD, ELVERSON, PA

*Do you, as a rider, fully understand new movements required with regard to frame, self-carriage, contact, rhythm, gaits and collection?*

*Is your horse physically strong enough to perform the new movements required as you progress through the training pyramid?*

Dave will help you to find the answers to these questions as well as:

- Help you to gain a full understanding of the biomechanical requirements as you move through the training pyramid
- Dissect each new movement and discuss the application of rider aids
- Create a training program for each horse and rider combination and identify key areas for improvement
- Combine knowledge, biomechanics and training to fully prepare you for the challenges to move through the training pyramid

## Dave Smith Bio

Dave Smith is an expert at.....
